

NEW

Battery-powered TORPEE-MAG

Flow-Tronic is pleased to announce the new evolution of the TORPEE-MAG offering with a waterproof self-contained solution.

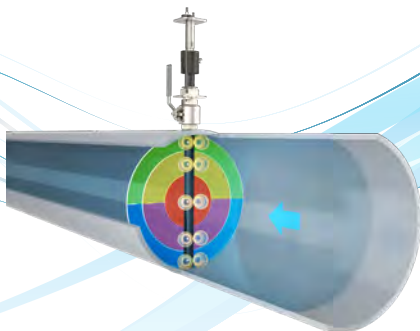

We can now provide our best in class insertion flowmeter powered with batteries for any application for which on-site power is not available.

Sample rate	1 s	2 s	5 s
Battery life	1 year	3 years	Up to 10 years

Graphite electrodes

- Long term stability
- Improved sensitivity at low velocities
- Guaranteed calibration stability for a minimum of 5 years

- No on-site calibration required
- Multiple electrodes across the flow section
- No installation error possible
- Near real-time profiling
- A fully developed profile is not required

Applications

- District Metered Areas
- NRW, water balance and night flow analysis
- Any flow monitoring application without mains power available
